CAREER PROFILE

Enthusiastic Software Developer with hands-on experience building scalable applications using .NET, ASP.NET Core Web API, Flask, Clean Architecture, CQRS, MediatR, EF Core, and PostgreSQL. Strong foundation in frontend development using React, Next.js, Tailwind CSS, and JavaScript, with experience developing responsive and user-focused web applications and integrating RESTful APIs. Passionate about software architecture, problem-solving, and building efficient, maintainable systems in Agile environments.

SKILLS

- **Frontend:** React, Next.js, Bootstrap, Tailwind
- **Backend:** Node.js, Flask, .Net, Express.js
- **Databases:** PostgreSQL, MySQL, MongoDB, Firebase
- **Tools:** Git, GitHub, REST APIs, Docker

Projects

Core Banking Platform (Microservices)

- Contributed to backend services responsible for banking product management and business rules implementation.
- Worked with Clean Architecture, CQRS, MediatR, EF Core, and PostgreSQL.
- Developed and maintained RESTful APIs for enterprise financial systems.

Diabetes Management App -[Demo](#)

- Developed a full-stack healthcare application with authentication, health tracking, and analytics features.
- Built responsive frontend interfaces using React and integrated Flask backend APIs.

Hospitality Booking Website

- Developed an interactive hospitality booking platform with multi-step booking functionality and dynamic guest interactions.
 - Implemented responsive UI design, booking validation, guest counters, and interactive JavaScript features.
-

EXPERIENCE

Software Developer Intern | Digisoft Consulting Services

Nov 2025 – Present | Nairobi, Kenya

- Developed an enterprise application using .NET 6, ASP.NET Core Web API, and PostgreSQL.
- Contributed to the development and maintenance of the Product Service within a core banking microservices architecture.
- Implemented Clean Architecture and CQRS patterns for scalable and maintainable systems.
- Built secure RESTful APIs following SOLID principles and best practices.

- Designed and optimized data access layers using EF Core and PostgreSQL.
- Contributed to CI/CD workflows using GitHub Actions.

Key Accomplishments:

Contributed to the development of the Product Service within a core banking microservices platform, enabling customers to view, configure, and select banking products efficiently through secure and scalable APIs.

EDUCATION

Moringa School | Software Engineering Bootcamp; May 2025 to November 2025

Egerton University | Bachelor of Science in Biochemistry; August 2016 to June 2021
